Gambhir Sharma

DevOps | Full Stack Developer

gambhiritaly@gmail.com • +39 351 474 6445 • Rome, IT • gambhir.dev • GitHub • LinkedIn • X

DevOps-Focused Full-Stack Developer with hands-on experience building modern web applications using Next.js, TypeScript, PostgreSQL, and Node.js. Passionate about cloud infrastructure and automation, with projects deployed on AWS and Kubernetes using CI/CD pipelines, Docker, and Helm. Skilled in infrastructure as code, GitOps workflows, and monitoring solutions. Proficient in Python scripting and automating infrastructure tasks through ad hoc tooling. Currently sharpening my cybersecurity skills through CyberChallenge.it CTF, while sharing DevOps and development insights through technical writing and Twitter.

Work Experience

CGI September 2025 – March 2026

DevOps Space Engineer - Intern *Rome, Italy | Full-time*

Worked across multiple spheres of DevOps, including CI/CD automation, cloud infrastructure management, and deployment optimization, with a strong DevSecOps focus on vulnerability analysis and remediation, and MLOps experience using Kubeflow and JupyterHub to support scalable ML and Earth observation data platforms.

RepoCraft June 2023 – February 2024

Full Stack Developer *Remote | Mumbai*

Worked on the open-source RepoCraft project, contributing to both frontend and backend. Gained experience building production-grade web apps and exposure to DevOps.

Education

Università degli Studi di Roma Tor Vergata September 2024 – Present

Engineering *Bachelor*

Pursuing the Engineering Science program, focusing on quantitative analysis, scientific reasoning, and multidisciplinary engineering concepts.

CyberChallenge.IT February 2025 – July 2025

Cybersecurity *Training Program*

Explored cryptography, web vulnerabilities, social engineering, and system-level exploit development through the CTF program, broadening my understanding of secure software design.

Projects

On Fly Image Optimization

Self-hosted image optimizer deployed on Kubernetes. Built with Next.js and Supabase Edge Functions, with observability via Prometheus and Grafana. Deployed using ArgoCD and Helm, with CI/CD pipelines automated through GitHub Actions and Kustomize.
Tech Stack: TypeScript, Next.js, Supabase, S3, GitHub Actions, PostgreSQL, Kubernetes, Helm, ArgoCD

Lambda web scraping

Built a serverless scraper using AWS Lambda, storing logs in DynamoDB and sending real-time alerts via the Telegram API. Fully deployed on AWS for scalability and cost-efficiency.
Tech Stack: AWS, EC2, DynamoDB, Python

Vercel Clone

Built a platform that deploys apps from GitHub URLs by building Docker images and deploying them to Kubernetes, automating the CI/CD pipeline.
Tech Stack: Next.js, Node.js, Kubernetes, Docker

Skills

Front-End: Next.js, React, TypeScript, Tailwind CSS, ShadCN/UI, Vue.js, React Router

Back-End: Node.js, Express.js, FastAPI, Flask, Phoenix (Elixir), tRPC, GraphQL, Kafka, Supabase, Firebase

Cloud: AWS (CDK, SAM), Serverless Framework, S3, EC2, Lambda

DevOps: Kubernetes, Helm, ArgoCD, Git, GitHub Actions, Terraform, Linux, Vim, Prometheus, Grafana, Nginx, Kustomize, Ansible, Chef, DefectDojo, Harbor, Kubeflow, Traefik

Open Source Contributions

#376: CGI Inc.'s LINO CLI tool

#1685: Tab Completion to AsyncAPI CLI

#1431: Freelens k8s custom theme

Hack Club: maintainer
